## How Many Packages? How Many Groups?

# Factor Bingo

### You need

- Number Cards for *Factor Bingo* (1 deck per pair)
- *Factor Bingo* Gameboards (1 per player)
- counters or pennies to cover the numbers

### Play with a partner.

- 1 Each player chooses one of the four *Factor Bingo* gameboards. Players play on different gameboards. For example, one player chooses Gameboard A and the other player chooses Gameboard B for the first game.
- 2 The first player draws a card from the deck of Number Cards for *Factor Bingo*. Each player looks at his or her gameboard and chooses one number that is a factor of the number on the card. Players cover that factor with a counter. Players can choose different factors.
- 3 The second player draws a card, and again players choose a factor of that number on their own gameboards and cover the factor with a counter.
- 4 If a player draws a Wild Card, the player says any number that is a multiple of 10, and all players must then find a factor of that number on their gameboards.
- 5 The game is over when one player has covered five numbers in a row, either vertically, horizontally, or diagonally.
